PILOTE

Like many companies throughout the World, Pilote has felt the effects of Covid 19.

Government requirements in France meant Pilote had to close their doors to both the Pilote and Le Voyageur manufacturing plants for a number of months putting their 2020 build orders many months behind.

As their factories re-open Pilote are committed to first and foremost completing builds for customers whom have pre-orders in place meaning dealers like ourselves whom order multiple units for our sales yard are going to find themselves short of stock.

Luckily we had some 2020 stock arrive early March and further units on the water as the lockdowns come into effect. This means in the short term we will have stock units available however in the mid term we are going to find ourselves short.

Pilote and DeLuxe RV hope to have 2021 models arriving into New Zealand near the end of 2020.

If you have been holding off then maybe now is your time to act before we sell out!
